

Here are some more fractions that are equal to $\frac{1}{2}$:

$$\frac{25}{50} \quad \frac{30}{60} \quad \frac{100}{200} \quad \frac{13}{26} \quad \frac{42}{84}$$

One thing you might notice about a fraction that is equal to $\frac{1}{2}$ is that the top number (numerator) is always half as big as the bottom number (denominator).

Another way of saying this is that the bottom number is twice as big as the top number.
